

Product Snapshot

SVG (Static VAR Generator) reactor cabinets are high-value, heavy and sensitive to dust & moisture. Shipping them inside their own ISO container avoids double handling and shortens site installation. Sunny Worldwide Logistics provides permit drafting, CSC renewal, 4-side photo inspection and ocean booking so your self-owned box sails smoothly from China to site anywhere in the world.

Product Details

1. Why Self-Owned Container (SOC)

- No need to return to depot—saves USD 1 200 in per-diem charges.
- Cabinet stays sealed from factory to site, cutting contamination risk.
- Faster project schedule: unload, position, connect—done.

2. Documentation & Compliance

- CSC survey arranged within 48 h; renewal sticker issued if expiry < 6 months.
- Nameplate data cross-checked with packing list for customs HS 8504.90.
- 4-side photos uploaded to cloud; link embedded in SI for carrier review.
- VGM obtained by weigh-bridge or calculated method, certificate PDF supplied.

3. Loading & Securing

- Cabinet bolted to container base frame with M20 chemical anchors—2 g forward / 1 g lateral.
- Desiccant bags & aluminium barrier foil keep RH < 40 % during 45-day transit.
- Shock recorder affixed; impact > 3 g triggers instant alert.

4. Multimodal Transport Chain

- Factory → port on 4-axle low-bed (height < 4.5 m after tarp).
- Port handling: SOC gate-in, no DTHC at origin if carrier SOC-free program.
- Ocean leg: on flat-rack or SOC box slot, stowage under-deck to minimise spray.
- Destination: SPMT or mobile crane lifts cabinet straight to foundation.

5. Destination Services

- Import customs under HS 8504.90 power-electronics cabinet; duty guidance provided.
- On-site positioning within 50 km radius included in selected packages.
- Empty container buy-back or repositioning arranged as required.
